This front matter is brought to you for free and open access by Research Library. It has been accepted for inclusion in Journal of the Department of Agriculture, Western Australia, Series 4 by an authorized administrator of Research Library. For more information, please contact jennifer.heathcote@agric.wa.gov.au, sandra.papenfus@agric.wa.gov.au, paul.orange@dpird.wa.gov.au.
The Department of Agriculture is working in partnership with the agricultural sector to achieve record export growth over the next 10 years as part of its valuable contribution to agriculture and the economy of Western Australia. The department is taking a leading role in the development and success of profitable, sustainable agriculture, free from damaging pests and diseases.

By developing and promoting the best available technologies and methods, developing integrated agricultural systems, undertaking relevant research, and providing useful information, the Department of Agriculture will generate and deliver innovative ideas and solutions to meet the challenges and accelerate the success of agriculture.

The Journal of Agriculture focuses on a selection of the many significant contributions being made to agriculture through the efforts of staff at the Department of Agriculture.
Testing the efficiency of broadacre farms

Rethinking the summer drenching program

Comparing size in lime

WA soil erosion under investigation

Bugs by the million for Medfly eradication

Crimson Seedless promises WA table grape boon

Ecological sustainability for pastoral management

ProteinPlus – increasing summer milk protein levels

Investigating teeth eruption and eating quality

Improving irrigation for Ord Sugarcane

Yellow lupins for the pig industry
