IMPORTANT DISCLAIMER

This document has been obtained from DAFWA's research library website (researchlibrary.agric.wa.gov.au) which hosts DAFWA's archival research publications. Although reasonable care was taken to make the information in the document accurate at the time it was first published, DAFWA does not make any representations or warranties about its accuracy, reliability, currency, completeness or suitability for any particular purpose. It may be out of date, inaccurate or misleading or conflict with current laws, polices or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (https://www.agric.wa.gov.au) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.
CONTENTS

Journal of Agriculture - Western Australia
Volume 31, No. 2 (4th Series) 1990 ISSN 0021-8618

43 Waterlogging: one reason why our crops and pastures are not achieving maximum yields

44 The extent and cost of waterlogging

48 Mapping the extent of waterlogged crop using satellite imagery

51 Waterlogging: how it reduces plant growth and how plants can overcome its effects

56 Plant growth and survival in saline, waterlogged soils

58 The causes of waterlogging

62 Waterlogging limits crop growth on duplex soils

66 Seepage interceptor drains for reducing waterlogging and salinity

70 Shallow drains for reducing waterlogging and salinity on clay flats

74 Level banks used to decrease waterlogging can increase salinity

78 Economics of interceptor drains: a case study

Issued by direction of the Minister for Agriculture and published four times a year by the Department of Agriculture, Western Australia.
