List of Departmental publications

Department of Agriculture, Western Australia
**LIST OF DEPARTMENTAL PUBLICATIONS**

The bulletins named in the following list are mainly reprints of articles which have appeared in “The Journal of Agriculture” and the date of the original publication has been appended to facilitate reference to bound volumes of the Journal. Except where a price is expressly stated, these bulletins may be obtained free of charge either by applying at the counter of the Department of Agriculture or by writing to the Officer-in-Charge of Publications, Department of Agriculture, Perth. If ordering by letter please quote the serial numbers of the bulletins, not the titles. Not more than ten bulletins can be supplied in response to each application.

The eradication of insect pests—Some observations on the Argentine ant campaign, W.A.—Sept., 1956.

Apple curculio—Sept., 1956.

Codling moth—Sept., 1956.

Formulas change in the control of lucerne fleas and red-legged earth mites—Jan., 1957.

An exhaust sprayer for grasshopper destruction—May, 1957.

Topical pesticides, experiment in their control in W.A.—May, 1957.

Clothes moths, carpet beetles and their control—July, 1957.

San Jose scale—Sept., 1955.

The citrus red scale—Mar., 1959.

The bark beetle in W.A. pine forests—May, 1959.

The Mediterranean fruit fly—Sept., 1959.

Some experiments on San Jose scale—Sept., 1959.

Potato moth control—Nov., 1959.

Termite or "White Ants"—Feb., 1960.

Control of red-legged earth mite and lucerne (treatment of seed with systemic insecticides)—Jan., 1960.

Insects and mites found attacking cereal crops in W.A.—June, 1960.

Rice stem borers at the Kimberley Research Station—Dec., 1960.

IRRIGATION AND WATER SUPPLIES

Permanent structures for irrigation farms—Sept., 1955.

A tank indicator gauge—Nov., 1954.

Irrigation in W.A. Govt. controlled schemes 53-54—May, 1955.

Roasted catchments for farm water supplies—May, 1956.

Irrigation projects on North-West stations—Nov., 1956.

How to make and use the 90 degrees V-notch—July, 1957.

Overcoming stock watering problems in the Kimberley Region—May, 1958.

MISCELLANEOUS

Training a sheep dog—July, 1952.

Shearing time—July, 1952.

Protection of birds and animals—Mar., 1954.

Strychnine poisoning in dogs—Sept., 1955.

Strychnine poisoning in dogs—Sept., 1955.

Registered Fertilisers—Supplementary list—Oct., 1960.

NORTH-WEST AND KIMBERLEYS

Gascoyne Research station's first field day—Sept., 1952.

Fodder conservation in East Kimberley—Sept., 1953.

Pastoral research—May, 1955.

Agricultural extension in the North-West and Kimberley—May, 1954.

Claypans in the North-West Spinifex areas—July, 1954.

Can a blackfellow do it—Sept., 1954.

Station management—the value of deferred grazing—Sept., 1954.

The wallaby menace in the Kimberleys—Sept., 1954.

Changes in pastoral vegetation can provide a guide to management—Nov., 1955.

Pastoral research—May, 1956.

Pastoral research in the Kimberleys—Sept., 1956.

Irrigation projects on North-West stations—Nov., 1956.

Kimberley research station, Mar., 1958.

Seed-box for sowing buffel and birdwood grass seed—May, 1958.

Mineral supplement for stock in pastoral areas—Jan., 1959.

The donkeys are doomed—Mar., 1959.

Paddock management and the euro problem in the north-West—May, 1959.

Opposed discs for furrowing in pastoral areas—Nov., 1959.

Wild dog control in the north-West—April, 1960.

Deferred grazing—What it may mean in the mulga region—April, 1960.

A successful campaign against the euro—Sept., 1960.

Soil conservation in the Kimberley area—Nov., 1960.

Rice stem borers at the Kimberley research station—Dec., 1960.
FARMERS and DAIRYMEN have no fear of breakdown or delays when LISTER is the prime POWER.

The NEW 1.75 K.W. Lister-powered air cooled Start-O-Matic fully automatic diesel generating set brings city power to the country. All standard 240 volt appliances can be operated from this amazing lighting plant, INCLUDING ALL MAKES OF TV SETS.

2637 Weed Control in Onions—May, 1959.
2679 Weed Control in Orchards—Sept., 1959.
2685 Weed Control in Channels—Nov., 1959.
2718 Weed Control Around the Yard—Feb., 1960.
2737 Weed Control in Vineyards—April, 1960.
2750 Afghan Thistle (Solanum Lysteris B. Br.)—May, 1960.
BAYER RESEARCH produces new answer to FRUIT FLY MENACE

NEW 'TRIPLE-ACTION' INSECTICIDE KILLS FRUIT FLY — ADULTS AND MAGGOTS — AND OTHER PESTS

• BY CONTACT
• BY PENETRATION
• BY SEMI-SYSTEMIC EFFECT

HERE IS AN INSECTICIDE WHICH CONTROLS ADULT FRUIT FLY AND AT THE SAME TIME PREVENTS MAGGOT DEVELOPMENT WITHIN THE FRUIT!

LEBAYCID is a completely new organic phosphorous insecticide developed by Farbenfabrikken Bayer A.G., of Leverkusen, W. Germany—the creators of Folidol E605, Dipterex, Metasystox 'I' and Gusathon. It is unique in its power to operate three ways: as a contact spray; by partial absorption into the plants—killing maggots as they feed; and by penetration of the fruit, killing fruit fly larvae as they hatch.

LEBAYCID also controls other important pome and stone fruit pests (e.g. peach tip moth and codling moth). On tomatoes, Lebaycid also shows promise as an effective means of suppressing mites, aphids and bugs.

AVAILABLE IN BOTTLES OF 1 OZ. AND 4 OZ. AND TINS OF 1 PINT

120 M.P.H. WIND HITS TREES! . . .
And They Love It. Because the 120 m.p.h. air blast came from a METTERS P.T.O. AIRMIST

The twin fantail unit for rows of small trees 12 to 16 feet apart.

The special twin fishtail for spraying vines.

The METTERS AIRMIST is a concentrated sprayer that atomises the already fine spray into a mist that blankets the trees, depositing fine drops that spread evenly for the most effective protection.

- AIRMIST spraying by the concentrate method give faster, more effective coverage without waste.
- Produces more first grade fruit. Uses only 125 gallons of water instead of 500 gallons by the old method for the same area.
- Saves 75% labour, 30% spray material and covers approximately two acres per hour.
- All components and controls are easily accessible.
- AIRMIST is the lowest cost machine of its kind.

847-851 Hay Street, Perth. Phone 21 9461
