# of nitrogen FREE!

Above every acre of land there floats an estimated 37,500 tons of free or atmospheric nitrogen. In this form it is worthless to your plants. But with the help of legume crops that have been inoculated with Nodulaid this nitrogen can be converted into a form easily absorbed by all plant life.
Results show that Nodulaid-inoculated legume crops can add more than 100lb. of nitrogen to every acre of your soil under average conditions. This is more nitrogen than you get out of nearly 5 cwts. of Sulphate of Ammonia, worth £10.

If Nodulaid is not available from your local seed merchant contact your State Distributor. He will be glad to help you.
