THE FLOUR STRENGTH OF WHEAT VARIETIES
CONTRIBUTED BY THE WHEAT AND SHEEP DIVISION

Over ninety different wheat varieties are planted commercially in Western Australia each year. Many of these however are grown in such small amounts that they have no effect on the flour quality of each season's harvest.

In the following table, the more important varieties are sub-divided into four groups according to their flour strengths as determined when grown on research stations and tested in the cereal research laboratory.

Strong: Charter, Festival, Yalta.

Weak: Baroota Wonder, Bencubbin, Bencubbin 48, Bobin, Bungulla, Canberra, Dan, Devon, Dowerin, Federation, Geeraling, Golden King, Gresley, Insignia, Insignia 49, Koorda, Merredin, Nabawa, Pinnacle, Raneé 4H, Regalia, Sword.

Very Weak: Bluclub, Clubhead, Gallipoli, Gluclub, Gluyas Early, Magnet, Marathon, Noongar, Quadrat, Totadgin, Waratah.

The strong group are the true “premium” varieties, however, most varieties in the medium strong class when grown under suitable conditions of soil and climate are also capable of producing “premium” grade flours.

High Performance!

THE SMITHDRAULIC LOADER

has

AMAZING REACH
EXCEPTIONAL 10ft. LIFT
15cwt. CAPACITY

If you buy a Smithdraulic Loader, you do not have to install hydraulic hoses as the Smithdraulic patented flexible hydraulic coupling is sufficient.

Powerful and obedient, this rugged new SMITHDRAULIC can be quickly converted from loading to bulldozing, tree-clearing and earthmoving. Extra equipment available:

- BLADE
- BUCKET
- JIB CRANE
- HAY SWEEP
- FORKED TYNE BLADE

Sack Trolleys on roller bearings, pneumatic tyres 250 x 6 (weight 20 lbs.) £13-14-6.

ROAD BOARD LOADERS
ROAD RIPPERS
LOADERS
BULLDOZERS
SILAGE MAKING IMPLEMENTS
All Types of GROUND ENGAGING IMPLEMENTS
CATTLE RACES from £18/18/-

SMITHDRAULICS

Of the Kerosene operated Tractors for the Australian farmer, nothing else can match the power, performance, and economy of the 55K. Dependability is really built into these fine Tractors.

The 55K gives you ample power for the biggest normal farm implements . . . power to work big areas quickly and thoroughly . . . reserve power for tough spots and bad conditions.

Compare the type of transmission employed in the 55 Series Tractors—silent running, helical cut gears, mounted throughout on Timken Tapered Adjustable Roller bearings. The entire transmission including the final drive is supported on Timken bearings. Years of trouble free and silent operation are embodied in such a carefully designed and tested gear set up.

Advanced engineering features include:—Heavy-duty special kerosene engine with replaceable wet sleeves; full pressure oiling system; battery ignition with automatic spark control; voltage regulator; selective sliding and constant-mesh transmission; hydraulic velvet-ride seat; swinging drawbar; individual or coupled brakes; self-starter, lights, internal power take-off.

If you want better protection this year against insect pests, change over to MALATHION—the powerful all-purpose insecticide. MALATHION opens up new possibilities in insect control and has so many advantages over other insecticides.

Highly toxic to insect pests. 
Kills insects, even those resistant to other insecticides. 
Residues on crops disappear quickly. 
Wide margin of safety to user. 
Malathion kills flies, too!

British-made Malathion is now available in insecticide preparations ... from your local supplier.

MALATHION gives better insect control for:
FRUIT CROPS
VEGETABLES
FLOWERS
ORNAMENTALS
FARM BUILDINGS
ANIMAL HOUSES
GARBAGE HEAPS
AROUND WATER TROUGHS

* O, O-dimethyl dithiophosphate of diethyl mercaptosuccinate.
