It may be out of date, inaccurate or misleading or conflict with current laws, polices or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (https://www.agric.wa.gov.au) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.
THE Animal Division of the Department of Agriculture—which includes the Veterinary Branch, the Animal Health and Nutrition Laboratories and the Poultry Branch—was transferred to new premises at Jarrah Road, South Perth, early in July.

All inquiries on veterinary and poultry matters should now be addressed to the Department of Agriculture, Jarrah Road, South Perth.

With the transference of the Veterinary and Poultry Branches from St. George's Terrace and the Animal Health and Nutrition Laboratories from Smythe Road,
Hollywood, all the technical branches and divisions of the Department of Agriculture are now located in a group of three modern two-storey buildings situated on a 30-acre site which once formed portion of the northern corner of the Collier Pine Plantation.

The site is bounded on the north-east by Jarrah Road and on the north-west by George Street (see map).

The new buildings will be officially opened by the Premier (Hon. D. Brand, M.L.A.) on August 26.

A fourth block of buildings to house the administrative staff of the Department is now under construction.

The old Department of Agriculture building in St. George’s Terrace will remain open for the time being to receive orchard registrations, but all technical inquiries should now be addressed to the South Perth centre.

---

**Erosion in Crop Land**

The sand you use for concrete work is the coarse portion of the soil which used to be growing crops and pasture on the slopes nearby. You are using a product of erosion but you have lost the clay, organic matter and plant nutrients forever. By way of reduced yields you are paying more for sand than if you transported sand from natural sources miles away. Use it by all means but don’t create more deposits for the use of your son.
