This article is brought to you for free and open access by Research Library. It has been accepted for inclusion in Journal of the Department of Agriculture, Western Australia, Series 3 by an authorized administrator of Research Library. For more information, please contact jennifer.heathcote@agric.wa.gov.au, sandra.papenfus@agric.wa.gov.au, paul.orange@dpird.wa.gov.au.
Published every second month by the Department of Agriculture, St. George's Terrace, Perth.

The subscription rate (which includes postage) is 10s. per annum. Single copies 2s. each.

Edited by J. A. MALLETT

Articles which appear in the "Journal" may be reprinted, provided that the "Journal" and the authors are acknowledged.

Issued by direction of THE MINISTER FOR AGRICULTURE.

COVER PICTURE
The Sturt Pea (Cianthus formosus) is restricted to Australia and inhabits the dry interior extending from the north-west coast of W.A. to western New South Wales. It is most commonly found in red sandy soils especially between Marble Bar and Roeboume and to the north and east of Kalgoorlie. As one of the specimens originally collected by Dampier it was among the first Australian plants to reach Europe.
