CROP PICTURE

Barley—the crop many farmers hope will provide them with an alternative to wheat now that quotas have drastically reduced wheat production. This month's issue outlines the techniques of barley production and discusses quality requirements and the prospects for barley as a profitable crop in Western Australia.

CONTENTS

Growing barley for grain in Western Australia—

Varieties and production methods .... H. M. Fisher 93

Barley quality .... J. A. Parish 97

The outlook for barley .... P. J. Hackett and E. J. O'Loughlin 100

Lupins in Western Australia—

5. The grazing value of green and mature lupins .... J. S. Gladstones 103

Results from recent research—

Once-daily calf feeding lowers rearing costs .... 107

Dry supplements reduce labour and cost of calf rearing 108

Supplementing calves with tallow .... 110

Recommended crop varieties .... 112

NEXT MONTH.—The storage life of farm dams—The making of a new pasture variety—Tractor test report (Zetor 5511)
