Funny how, when things change gradually, you don't notice them. It took me four days to sow the west paddock last season, and I used to do that paddock in two and a half days. That got me to thinking. It was true. So I decided the old tractor was due for replacement. Happened to be in town that week and talking to the tyre dealer. He told me about FULL PULLING POWER and quoted a few cases to prove it. The result was he came out and put new Dunlop tyres on the old horse, and next day they proved it was loss of power, not lack of it. These Dunlop tyres have a continuous tread pattern. You don't hop from one tread bar to another. Before the load is off one bar, the next one is beginning to take it up. When trash gets in, the weight pushes the trash outward, splayed tread bars reinforced at the base keep it moving, and it falls clear. Full pulling power has sold me on Dunlop tyres. It'll sell you, too. Have a yarn with your Dunlop tyre dealer soon.
