Advisory Services.—Wheat and Sheep, Soil Conservation, Vermin Control, Weed Control.

WILUNA
Officer-in-Charge.—D. G. WILCOX.
The secret is underground

Bringing water to portable lines is a job for

‘FIBROLITE’ PIPES

Easier, faster, more efficient spray irrigation when you lay a main line of ‘Fibrolite’ Pipe from the water source to the portable lines. This permits shorter spray lines that are easy to move and get less wear and tear. Full water pressure is assured because ‘Fibrolite’ Pipes don’t rust or corrode; they are cheaper, quick and easy to lay and need little or no maintenance.

‘Fibrolite’ main lines are used by irrigationists all over Australia.

Write for more information about ‘Fibrolite’ Asbestos Cement Pipes today.
