# Journal of Agriculture

Western Australia, June, 1973

Volume 14, No. 2 (4th series)

## CONTENTS

- 166 Management policies for increasing sheep turnoff**  
Methods for increasing the number and productivity of breeding ewes to supply known markets for live sheep and sheep meats, while still maintaining farm profits.
- 171 The soil conservation service**  
The functions of the Soil Conservation Service and the basis of its co-operation with landholders.
- 175 Objective measurement of wool**  
The criteria, methods and equipment used in objective measurement of wool.
- 179 Learning to live with clover scorch**  
Present knowledge of clover scorch, means of minimising its effects and an outline of current research.
- 182 New laboratory for virus disease studies**
- 183 The art and science of plant breeding**  
An outline of the techniques which underlie most modern plant breeding programmes.
- 189 Research round-up**  
Shipping live sheep—Grape guards prove their worth—Resistance to clover scorch—Stocking rate and time of calving—Fleece weight selection twice as effective as hand classing—Puccinellia needs nitrogen—Parrot research—Seed dormancy in annual ryegrass.
- 195 Chemicals for Argentine ant control**  
The development of the Argentine ant control programme in W.A., and the search for safer chemicals.
