CONTENTS

2 Skeleton weed—the 1974 Narembeen campaign
   How the Agriculture Protection Board and farmers combined
   to fight the State's biggest outbreak of skeleton weed.

5 Linseed—a forgotten crop
   Why linseed production has declined in Western Australia—
   and why it should be a crop worth growing here.

8 Income tax for primary producers
   Increased farm incomes and changes in income tax provisions
   could make March, 1975, a time of reckoning for many farmers.

12 Grain moisture problems on the south coast
   Approaches to the problem of high moisture content in
   cereal grain at harvesting time on the south coast.

15 Grain moisture and the weather—What can the records
   tell us?
   Study of weather records may lead to more accurate pre-
   dictions of safe harvesting periods to help overcome grain
   moisture problems.

20 Conservation of the National Estate
   Summary of a submission made by scientists of the Department
   of Agriculture to the Committee of Inquiry into the National
   Estate.

26 Research Round-up
   Reproductive wastage among Merino ewe flocks : 1. Clover
   areas ; 2. Non-clover areas—The effects of pasture type and
   lupin grain supplementation on ovulation rate of Merino ewes :
   1. Rate of supplementation ; 2. Duration of supplementation.
