Journal of Agriculture

Western Australia, March, 1975

Volume 16, No. 1 (4th series)

CONTENTS

- 2 Virus diseases in agriculture**
The cause, significance and means of transmission of plant virus diseases
- 7 Blackleg of rapeseed**
A summary of current knowledge of the fungus disease which almost wiped out the rapeseed industry in Western Australia
- 11 Prospects for a successful rape crop**
The use of "indicator" plots to assess blackleg risk
- 12 A unit for trapping clean pollen**
An improved design for collecting pollen from honeybee colonies
- 14 Kenaf**
Background information and some early research findings on a possible multi-purpose crop for the Ord River Irrigation area
- 19 Research round-up**
Peanuts for the Ord?—Ryegrass control recommendations proved effective—Drop inlet spillways for gully dams
- 23 The doublegee problem in Western Australia**
Background to a Department of Agriculture research programme on a widespread and troublesome weed of crops and pastures
- 26 Lupinosis**
Review on a complex and baffling stock disease
- 31 Phomopsis—the causal fungus of lupinosis**
The fungus which produces the lupinosis toxin
