IMPORTANT DISCLAIMER

This document has been obtained from DAFWA's research library website (researchlibrary.agric.wa.gov.au) which hosts DAFWA's archival research publications. Although reasonable care was taken to make the information in the document accurate at the time it was first published, DAFWA does not make any representations or warranties about its accuracy, reliability, currency, completeness or suitability for any particular purpose. It may be out of date, inaccurate or misleading or conflict with current laws, polices or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (https://www.agric.wa.gov.au) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.
CONTENTS

2 Virus diseases in agriculture
   The cause, significance and means of transmission of plant virus diseases

7 Blackleg of rapeseed
   A summary of current knowledge of the fungus disease which almost wiped out the rapeseed industry in Western Australia

11 Prospects for a successful rape crop
   The use of "indicator" plots to assess blackleg risk

12 A unit for trapping clean pollen
   An improved design for collecting pollen from honeybee colonies

14 Kenaf
   Background information and some early research findings on a possible multi-purpose crop for the Ord River Irrigation area

19 Research round-up
   Peanuts for the Ord?—Ryegrass control recommendations proved effective—Drop inlet spillways for gully dams

23 The doublegeee problem in Western Australia
   Background to a Department of Agriculture research programme on a widespread and troublesome weed of crops and pastures

26 Lupinosis
   Review on a complex and baffling stock disease

31 Phomopsis—the causal fungus of lupinosis
   The fungus which produces the lupinosis toxin
