IMPORTANT DISCLAIMER

This document has been obtained from DAFWA's research library website (researchlibrary.agric.wa.gov.au) which hosts DAFWA's archival research publications. Although reasonable care was taken to make the information in the document accurate at the time it was first published, DAFWA does not make any representations or warranties about its accuracy, reliability, currency, completeness or suitability for any particular purpose. It may be out of date, inaccurate or misleading or conflict with current laws, policies or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (<https://www.agric.wa.gov.au>) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.

Journal of Agriculture

Western Australia

Volume 17, No. 1 (5th series), 1976

CONTENTS

- 2 **Trikkala—a new safe clover for wet areas**
New subterranean clover an alternative to Yarloop for winter-wet situations.
- 4 **Nungarin—earliest sub. clover cultivar**
New subterranean clover for the wheatbelt.
- 5 **Subterranean clover in W.A. 1. The current situation**
Changing fortunes of the State's most important pasture plant.
- 10 **Protecting Agriculture in 1976—three sides of an A.P.B. campaign**
Agriculture Protection Board action against skeleton weed, Noogoora burr and starlings.
- 14 **New control for Esperance armyworms**
1975 trial results indicate that well-timed trichlorfon applications will control armyworms.
- 16 **Root rot of subterranean clover in W.A.**
The disease, its symptoms and the current state of research into the root rot problem.
- 20 **Lupin "split seed"—a disorder of seed production in sweet, narrow-leafed lupins**
Department of Agriculture research brings good progress towards control of a unique problem.
- 26 **Subterranean clover in W.A. 2. Characteristics required for agronomic success**
Characteristics sought by plant breeders in their efforts to produce better clovers for Western Australia
- 32 **Research round-up**
Green lemons safe from fruit fly—Red-legged earth mite cuts pasture production—Cattle fertility not harmed by pour-on insecticides—Lettuce and tomato variety trials.
