IMPORTANT DISCLAIMER

This document has been obtained from DAFWA's research library website (researchlibrary.agric.wa.gov.au) which hosts DAFWA's archival research publications. Although reasonable care was taken to make the information in the document accurate at the time it was first published, DAFWA does not make any representations or warranties about its accuracy, reliability, currency, completeness or suitability for any particular purpose. It may be out of date, inaccurate or misleading or conflict with current laws, polices or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (https://www.agric.wa.gov.au) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.
CONTENTS

70 The Mediterranean white lupin
   Historical notes on the Mediterranean white lupin, recently
   released for commercial production in Western Australia but
   cultivated (in its bitter form) for thousands of years in Medi­
   terranean countries.

75 Emus on the move—1976
   Why emus from the pastoral areas congregated for “the
   greatest migration of emus in recent times”—and how the
   Agriculture Protection Board handled the exodus.

77 The control of annual ryegrass
   A review of research into annual ryegrass—and current recom­
   mendations for its control.

82 Efficiency of sprinkler irrigation systems
   Comments on the design of sprinkler systems for more efficient
   use of water.

85 Bounty systems in vermin control
   A critical review of bounty systems in animal population
   management finds little evidence of success.

90 Wild oats in W.A.
   Some results of a detailed ecological study of an important
   crop weed, with notes on cultural and chemical control
   methods.

96 The cork oak
   A brief description of the cork oak and cork production, with
   comments on commercial prospects for cork in Western Aus­
   tralia.

98 Research round-up
   Strip vs continuous grazing of irrigation pasture—
   Testing crop varieties in 1975/76.
