CONTENTS

102 The feral goat herd of Faure Island
   Studies on an isolated Angora type goat herd on an island in
   Shark Bay, Western Australia, indicate potential for high
   quality mohair production.

107 A comparison of hay conservation systems
   An Esperance study compares costs of new and traditional
   systems of hay conservation.

113 Armyworm control in coarse grain crops
   1976 trials lead to new recommendations for control of army-
   worm and reveal a significant parasitic wasp.

117 Grain crop varieties for Western Australia
   Notes on characteristics of varieties of the grain crops recom-
   mended for growing in Western Australia.

125 Progress in the nursery industry
   Review of a rapidly expanding, sophisticated primary industry
   in Western Australia.

127 Low protein rations halve bacon pig profits
   Medina Pig Research Station trials emphasise the importance of
   adequate protein in bacon pig rations.

130 Meat marketing—The L.I.P.C. and Japan’s meat import
   controls
   Background to a Japanese market structure of vital importance
to Australian meat exports.

131 Index to Volume 17, 1976.
