IMPORTANT DISCLAIMER

This document has been obtained from DAFWA's research library website (researchlibrary.agric.wa.gov.au) which hosts DAFWA's archival research publications. Although reasonable care was taken to make the information in the document accurate at the time it was first published, DAFWA does not make any representations or warranties about its accuracy, reliability, currency, completeness or suitability for any particular purpose. It may be out of date, inaccurate or misleading or conflict with current laws, polices or practices. DAFWA has not reviewed or revised the information before making the document available from its research library website. Before using the information, you should carefully evaluate its accuracy, currency, completeness and relevance for your purposes. We recommend you also search for more recent information on DAFWA's research library website, DAFWA's main website (https://www.agric.wa.gov.au) and other appropriate websites and sources.

Information in, or referred to in, documents on DAFWA's research library website is not tailored to the circumstances of individual farms, people or businesses, and does not constitute legal, business, scientific, agricultural or farm management advice. We recommend before making any significant decisions, you obtain advice from appropriate professionals who have taken into account your individual circumstances and objectives.

The Chief Executive Officer of the Department of Agriculture and Food and the State of Western Australia and their employees and agents (collectively and individually referred to below as DAFWA) accept no liability whatsoever, by reason of negligence or otherwise, arising from any use or release of information in, or referred to in, this document, or any error, inaccuracy or omission in the information.
**DEPARTMENTAL PUBLICATIONS**

The bulletins named in the following list are mainly reprints of articles which have appeared in “The Journal of Agriculture” and the date of the original publication has been appended to facilitate reference to bound volumes of the Journal. Except where a price is expressly stated, these bulletins may be obtained free of charge either by applying at the counter of the Department of Agriculture or by writing to the Publications Officer, Department of Agriculture, Jarrah Road, South Perth. If ordering by letter please quote the serial numbers of the bulletins. Not more than ten bulletins can be supplied in response to each application.

**LYSAGHT READY TO ASSEMBLE**

**200 BUSHEL SILO**

- Prefabricated for easy erection on site.
- Ideal for small quantity storage — Special feed, seed wheat, etc.
- Eliminates deterioration due to bag storage.
- Eliminates high bag costs.
- Rodent-proof.
- Weatherproof.
- Low initial cost with NO maintenance.

**DIMENSIONS**
- Diameter: 7' 6"
- Wall height: 6' 0"
- Overall height: 7' 6"
- Weight packed: 4 cwt.

**OTHER GRAIN SILOS PRICES Ex Fremantle Store**

What's the good of water... unless you’ve got it where you want it?

WATER — your most priceless commodity — isn't worth a ha’penny unless you’ve got it at the right place at the right time.

That's where Mono scores with the most efficient, most dependable range of Pumps and Automatic Water Pressure Systems money can buy.

Why is Mono so vastly different? ... Mono employs the world's simplest, most effective, most efficient positive displacement system. With only one moving part — without valves, gears or the need for lubrication — Mono creates a powerful continuous sucking action that stops only when you switch it off.

Without interruption — without interference from air, slush or solids in solution — your self-priming Mono continues to draw liquids while there's liquid there to get. Sand, silt and abrasives create no hazard, for Mono is built to withstand rough usage. Ask any owner. He'll tell you Mono is undoubtedly your best pump investment. Then see your Mono dealer; he will give you all the interesting facts and figures.

The Mono pump

MONO PUMPS (AUSTRALIA) PTY. LTD.
