Contents

Journal of Agriculture — Western Australia

Volume 21, No.2 (4th series), 1980. ISSN 0021-8618

35 Computers for the farm
An assessment of the places for a computer on the farm.

38 Effect of fallowing on cereal yields
A review of trials on fallowing.

42 Pasture establishment on old land in high rainfall regions
Recommendations for establishment of new clovers.

46 Larisa —
a clover for very wet areas.

48 Management of cereals for control of take-all
Some recommendations based on recent research.

52 The sandgroper —
a sometimes not-so-friendly Western Australian.

54 Improving production from pigs
Two schemes are helping farmers produce leaner, meatier pig carcasses.

57 Polioencephalomalacia —
an increasing problem with sheep in the Great Southern.

58 Mandarin varieties give range of maturities
A list of varieties of mandarins which should encourage production.

60 Prospects for agricultural trade with China
Some opportunities for trade with "the world's largest market".

63 Footrot —
Watch for lame sheep and footrot.

Issued by direction of the Minister for Agriculture, and published four times a year by the Department of Agriculture, Western Australia.

Editor — D. Rees; Design — L. Webb.
