### THE WORLD'S POULTRY CONGRESS

The 12th World's Poultry Congress which will be held in Sydney next month will be the first international rural Congress ever held in Australia. It is also the first World Poultry Congress held in the southern hemisphere, and as it coincides with the 50th anniversary of the World Poultry Science Association it will be celebrated as the Golden Jubilee Congress.

The Congress will be held at the Sydney Showgrounds from August 10-18. Fifty countries will be represented and about 130 papers will be presented in the five major sections of Genetics and Breeding, Nutrition and Physiology, Diseases and their Control, Economics and Marketing, and Husbandry.

In association with the technical discussions, an exhibition “the like of which has never been attempted before in this country” has been organised. Included in this will be a panorama of the Australian poultry industry, National Exhibits from overseas countries, a large commercial display by both local and overseas interests, a Live Bird Exhibition, a display of Australian bird life and a monster chicken barbecue.

The Congress is not restricted to scientists and official delegates; anybody can register, and it is expected that there will be a big attendance of commercial poultry interests and poultry farmers. A number of poultry farmers from Western Australia have registered for the Congress and there is still time for other interested poultry farmers from this State to register. Cost of registration is £5, or £4 for members of the World Poultry Science Association.

Enquiries should be sent to:

The Secretary General,
12th World's Poultry Congress,
Department of Primary Industry, Kembla Building,
58 Margaret Street, Sydney, N.S.W.
