ors are acknowledged.

—
COVER PICTURE

Record rains in many dis-
tricts during June this year
produced damage like this in
some crops—damage which
often might have been
avoided by good contour
farming practices.
In an article on p. 297 of
this issue Soil Conservation
Adviser W. J. Burdass points
out that continuous cropping
can increase the erosion haz-
ard—and gives some prac-
tical hints on how to avoid
this problem.

Contents

Multiple Cropping will Increase the Erosion Hazard W. J. Burdass	297
Chemical Thinning of Plums and Peaches J. Cripps and K. T. Whitely	302
Private Irrigation Systems—Do they pay?	G. D. Oliver 309
The New Course at Muresk Agricultural College D. K. Bartels	316
Cyanogenetic Plants of Western Australia	T. E. H. Aplin 323
Fertiliser Responses with Newly Planted Apple Trees N. H. Shorter	333
Pullorum Tested Poultry Flocks, 1966-67	337
